
epub-metadata

Release 0.0.1b0

ThanatosDi

Dec 24, 2022

CONTENTS:

1	epub package	1
1.1	epub	1
1.2	metadata object	1
1.3	opf_parser	2
2	Indices and tables	3
	Python Module Index	5
	Index	7

EPUB PACKAGE

1.1 epub

1.2 metadata object

class Metadata(*metadata: dict*)

Bases: object

property version: str

get epub version

Returns

epub version

Return type

str

property title: str

get epub title

Returns

epub title

Return type

str

property creator: str

get epub creator(author)

Returns

epub creator(author)

Return type

str

property date: str

get epub public date

Returns

epub public date

Return type

str

property cover: str

get epub cover base64

Returns

epub cover base64

Return type

str

property cover_type: str

get epub cover type

Returns

epub cover type

Return type

str

property description: str

get epub description

Returns

epub description

Return type

str

property publisher: str

get epub publisher

Returns

epub publisher

Return type

str

property identifier: str

get epub identifier

Returns

epub identifier

Return type

str

1.3 opf_parser

INDICES AND TABLES

- `genindex`
- `modindex`
- `search`
